

Module 2 — Update Set Creation

Creating and Activating the Project Update Set

1. Purpose

Create a dedicated Update Set so project configuration changes can be captured and moved between ServiceNow environments.

2. Navigation

Go to All menus → Search for Update set.

Under System Update Sets → Select Local Update Sets.

Click the New button on the top right corner.

3. Update Set Configuration

- Name: Project Update Set

State: In progress

- Application: Global

Save the form.

4. Make the Set Current

Under Related Links, click Make This My Current Set.

The created Update Set will then appear as the Current Update Set.

5. Module Outcome

The project has an active Update Set ready to capture the custom table, fields, dependency configuration, Flow Designer automation, and related changes.

Source basis: Uploaded project document, "Auto Ticket Classification using Flow Designer."
